Travel Humidifier

The ideal travelling companion

One of the world's smallest Ultrasonic Humidifier... Now you can take AIR-O-SWISS quality with you wherever you go and enjoy healthy air anywhere! This travel humidifier is compact, light-weight and fits into any carry-on bag or briefcase so you can ensure that room humidity is just the way you like it in your hotel room or work site.

Global usage

Thanks to the transcontinental AC/DC adapter and exchangeable plugs the Travel Ultrasonic can be used around the world (North America, Europe, Asia). It also includes a convenient travel bag for easy storage and transport that can even be used to clean the outside of the humidifier.

Easy operation and handling

The Travel Ultrasonic is equipped with an automatic shut-off as well as an operation and «empty tank» indicator. The fold-out feet ensure stability and the flip-open mist outlet makes it convenient to transport and store. The unit features a removable upper body for easy cleaning.

Ultra-quiet operation

The variable control switch allows you to regulate mist output to guarantee optimal humidification. Whether your unit is set for low or high humidity output – the travel ultrasonic is extremely quiet to ensure a good night's sleep (equivalent to the sound of a sleeping baby).

PET bottle adapter

Just insert your own standard water bottle, plug the unit in and enjoy clean, moist air in your room. You can refill the bottle with clean tap or distilled water, therefore using it over and over again. Using distilled water eliminates the possibility of white dust precipitation appearing during operation.

System description

The efficient ultrasonic system uses high-frequency vibrations to turn water into a micro-fine mist, which is then blown by a fan into the room. All AIR-O-SWISS and BONECO Ultrasonic humidifiers are equipped with an automatic shut-off and a mist output regulator to ensure properly humidified air.

Technical specifications

Mains voltage	100 - 240 V / 50 - 60 Hz	Recommended bottle size (NOT included)	0.5 litre PET
Power consumption	15 W	Dimensions	110 x 65 x 80 mm
Humidity output up to	100 g/h	Weight (empty)	0.3 kg
		Operation noise level	< 25 dB(A)
